02. LEADERSHIP KEY PERSONNEL

MSV has established a **strong local technical and management team**, supported by experienced and highly respected mining professionals . The company is guided by an **Advisory Board** of accomplished industry leaders, **providing strategic oversight and independent advice.**

In support of the executive management team, MSV has also engaged a group of **Senior Technical Advisors** who provide **JORC and NI 43-101 sign-off capability**, along with specialist expertise across **environmental, health, safety and sustainability (EHS&S)** and **geological disciplines**, ensuring robust governance, technical assurance, and compliance with international standards

02. LEADERSHIP KEY PERSONNEL

BOARD OF DIRECTORS

Lon Taranaki
General Director

Process Engineer with over 31 years' mining experience across multiple jurisdictions. Strong background in executive leadership, engineering, mining operations and project delivery, with a Southeast Asia focus across coal, nickel, gold, and copper.

Hai Nguyen Ngoc
Director & Geology Lead

Geologist with a Master of Science in Geology and over 20 years' experience across exploration and mine geology management. Strong technical capability with proficiency in industry-standard geological software, extensive experience designing and managing EM, DHEM, and 3D IP programs, and a deep understanding of Vietnamese reserve reporting requirements and JORC standards.

Thanh Nguyen Van
Director & Mining Lead

Mining Engineer with 13 years of hands-on experience across open pit and underground operations in Vietnam, Laos, and Cambodia. Strong technical capability supported by proficiency across industry-standard mining software and extensive experience in permitting and licensing mining projects in Vietnam.

ADVISORY BOARD

Dr. Chris Swindells
Advisory Board

Senior engineering and environmental professional with over 45 years' experience leading technical teams across the mining and infrastructure sectors. Former senior executive at Golder Associates, where he held multiple leadership roles across Australia, Asia and Africa for over 32 years, including leading the Mining Services team in EMEA, APA and globally.

Jeremy Ayre
Advisory Board

Jeremy Ayre brings over 35 years' experience spanning mining, consulting, investment, and entrepreneurship. He is a co-founder of AWR Lloyd, a boutique strategic consulting and M&A advisory firm operating across South-East Asia, with a strong focus on the energy and mining sectors. He has co-founded a London-listed private equity fund and, more recently, established a remote power generation business. Jeremy's work centres on strategic advisory, capital structuring, and the development of resilient, long-term businesses.

02. LEADERSHIP KEY PERSONNEL

EXECUTIVE MANAGEMENT

Hoan Le Thi Ngoc

Executive Management & HR Lead

Human Resources professional with a master's degree in human resources management, providing comprehensive HR services to Vietnamese and international organisations. Extensive experience in organisational design, role and job description development, recruitment and onboarding, development of company-wide HR policies and procedures, and holding senior leadership roles.

Hung Nguyen Phuc

Executive Management & Snr Project Manager

Mechanical Engineer with a Bachelor of Science in Mechanical Engineering and experience across engineering and process operations. Strong capability working to international standards including ASME and ASTM. Experience in project management, studies delivery, permitting and licensing approvals, and subcontractor management. Brings deep operational experience having worked as a senior maintenance leader at a world-class tungsten operation.

Tien Dinh Van

Executive Management & Snr Project Manager

Construction and civil works professional with a Master's degree in Transport Works Engineering and a strong background in infrastructure, transport, and civil design. Extensive experience in project and contract management, including delivery of multi-million-dollar construction contracts under FIDIC forms, management of consultants across Pre-FS, FS, detailed and construction design phases, and oversight of contractors and subcontractors during construction execution.

02. LEADERSHIP KEY PERSONNEL

SENIOR TECHNICAL ADVISORS

Will Coverdale

JORC & NI43-101 Reserves

Qualified Mining Engineer with an MBA and over 19 years' experience across the mining and metals sector, spanning open pit and underground operations. Extensive background in project evaluation, due diligence, M&A, project planning and development, technical and strategic consulting, and founder of a mining-related IT start-up. Recognised Competent Person for JORC & NI 43-101 Reserve reporting.

Chris Ramsay

JORC & NI43-101 Resources

Experienced mineral resource and mine development professional with over 25 years' global experience across the mining value chain. Expertise includes mineral exploration, resource estimation, project development and evaluation, resource governance, mine geology, and operational management. Recognised Competent Person for JORC and NI 43-101 resource reporting.

Ph.D. Minh Dinh Huu

Regional Geology Expert

Senior exploration and project evaluation professional with over 40 years' experience across a broad range of commodities, including nickel-copper (PGE), gold, copper-gold, copper, tin, and mineral sands. Extensive experience in technical review, peer evaluation, and academic supervision, including guidance of undergraduate and MSc theses and service as an examining and review board member for PhD and Master's research in gold and non-ferrous mineral systems.

Hung Tran Huu

EHS & Sustainability

Experienced EHS & Sustainability professional with 15 years' experience in electronics, electric vehicle, industrial real estate, metal mining & processing sectors. Highly proficient in international environmental and social (E&S) standards, including IFC Performance Standards, OECD guidance, ISO standards, as well as North American, European, and Vietnamese regulations.

03. CORE COMPETENCIES

EXPLORATION & GEOLOGICAL SERVICES

MSV provides an end-to-end exploration capability, combining program design, execution, and technical reporting using in-house teams, equipment, and specialist support. This integrated approach improves data quality, schedule control, and cost efficiency.

1

Grassroots exploration

2

Geophysical surveys

3

Geological database management and technical reporting

4

In-house core logging, sampling, laboratory management, and data preparation

RESOURCE & RESERVE DEVELOPMENT

MSV develops geological, resource, and reserve models using industry-standard software including Surpac and Micromine, compliant with local, JORC, and NI 43-101 reporting requirements.

Reserve development includes mine optimisation and reserve conversion studies, supported by an extensive internal cost database, with certification provided by MSV's Competent Persons where required.

PROJECT DELIVERY

MSV operates as Owner's Representative or EPCM contractor, managing engineering, procurement, construction, and commissioning to achieve scope, cost, schedule, quality, safety, and performance objectives.

OPERATIONAL READINESS & SUPPORT

MSV supports the transition from development to steady-state operations, establishing robust, compliant operating organisations, including HR, procurement, finance, governance, HSE, and reporting systems.

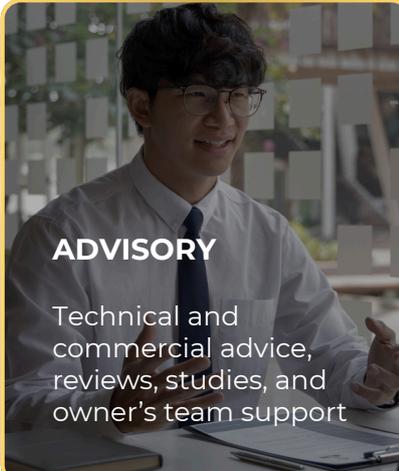

04. SERVICE DELIVERY MODEL

MSV offers a **flexible service delivery model** aligned to project stage, risk profile, and client objectives, engaging as an advisor, EPCM contractor, or embedded team.

Across all engagement models, MSV delivers **practical, cost-effective solutions** to international standards, aligned with local operating conditions and project objectives.

ENGAGEMENT OPTIONS

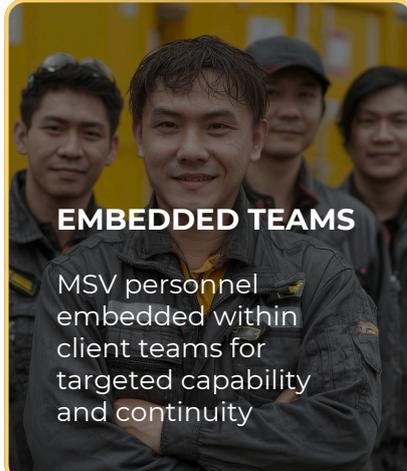

ADVISORY

Technical and commercial advice, reviews, studies, and owner's team support

EPCM

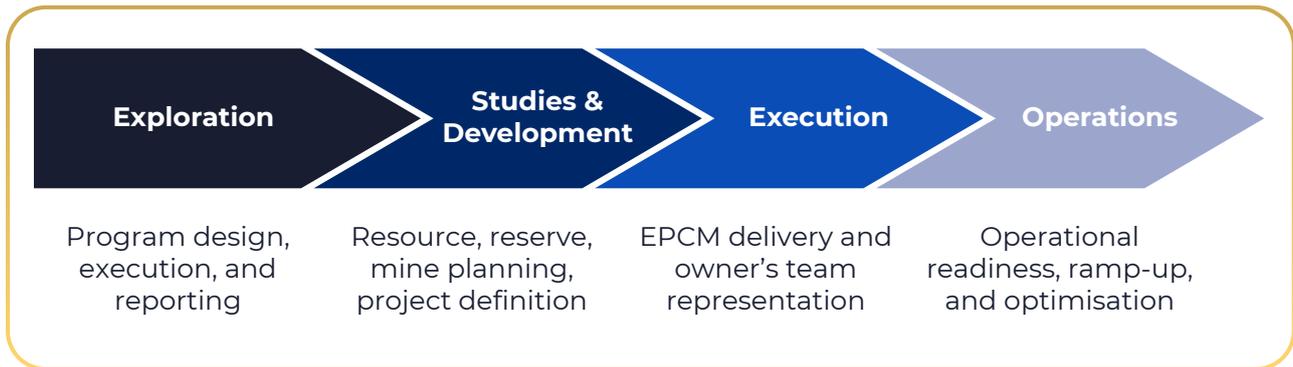

Integrated delivery of engineering, procurement, construction management, and commissioning

EMBEDDED TEAMS

MSV personnel embedded within client teams for targeted capability and continuity

PHASE-BASED SUPPORT

05. OUR PROJECTS

SAMBO CAMBODIA

Aug 2025 - Ongoing

GOLD
Commodity

DESCRIPTION

Providing the client with a full suite of services to take their project from exploration through production.

SERVICES

- Exploration & Geological Services ✓
- Resource & Reserve Development ✓
- Project Delivery (Owner's Team & EPCM) ✓
- Operational Readiness & Support ✓

DELIVERY MODELS

- Advisory ✓
- EPCM ✓
- Embedded Teams

05. OUR PROJECTS

DESCRIPTION

Provided the client with grass roots exploration services (mapping, soils, rock chips and trenching) and drill target generation for gold.

SERVICES

- Exploration & Geological Services ✓
- Resource & Reserve Development
- Project Delivery (Owner's Team & EPCM)
- Operational Readiness & Support

DELIVERY MODELS

- Advisory ✓
- EPCM
